# What's Unique About Masseur Massage?

## Flexi-Track

Allows the amazing free-floating massage heads to contour to the space of your spine and provide you with a customised deep tissue massage all over your body, in all the right places.

## Advanced 4D Massage System

Masseur's revolutionary 4D Massage System feels like the hands of several massage therapists, easing pain and tension while delivering the most realistic, full body massage ever provided by a massage chair.

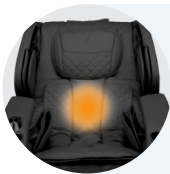

## Full Body Air-Spa Massage

Relieve muscle and joint pain with 60 air cushions around the body applying gentle compression massage to your arms, shoulders, back, hips, legs and feet, so you'll feel completely relaxed and rejuvenated.

## Intelli-Scan Technology

The most advanced automatic body scan on the market will determine your problem areas by mapping your unique requirements, finding your pressure points and tense muscles, and targeting those areas with specific massage styles and intensities.

# Now For The Fun Bits!

## Hot Stone Massage

The Hot Stone Massage radiates heat of up to 50°C to relieve aches and pain. Infrared wave lengths match the human body wave lengths to allow better heat absorption and to promote a faster metabolism. Heat relaxes the body, allowing deeper muscle tissue penetration to reduce soreness and accelerate recovery.

## Integrated Arm & Shoulder Air Cushions

Set with 22 adjustable hand, arm and shoulder air cushions to wholly relax and refresh you from your arms to your fingers. These air cushions are designed to inflate around your natural body shape to relieve tension, as well as improve blood flow and circulation in a wave-like motion towards the heart.

## Foot & Leg Air Cushion Massage

Specially designed calf, ankle and foot air cushions compress, pause and release air pressure around your legs to achieve three levels of stimulation. Compression massage promotes better circulation and reduces swelling, proving more effective than usual passive treatment methods like compression socks.

## Reflexology Rollers

Three rows of textured sole rollers, designed with 88 massage nodes, work in harmony to emulate a professional foot massage. These, along with accompanying air cushions, relieve your feet by focusing on major reflexology points. Set the intensity with adjustable speed and strengths to give yourself the perfect, tailored foot massage you deserve.

## Magnetic Therapy

Magnetic therapy is enabled by the presence of eight natural energy magnets in the calf air cushions. Utilising static energy, magnetic therapy helps to effectively alleviate aches and pain in the legs, ankles and feet.

# Massage Therapy Has Been Scientifically Proven To Improve Your Health And Wellbeing In Many Areas

Imagine three masseurs working on your tired body all at once.... how does that feel? You can now surrender to the power and the pleasure of unforgettable deep tissue massage therapy whenever you need it.

Experience a high-quality, full-body massage treatment that feels just like the healing hands of three massage therapists - hitting all the right places, with our Remedial Deluxe Plus massage chair.

Improve your health and wellbeing with a range of full-body Deep Tissue, Relaxation, Stretch and Compression massages.

**Massage therapy is a natural, non pharmaceutical and beneficial form of treatment for a variety of health concerns.**

Massage can help with injuries, illnesses and chronic health conditions by;

- relieving stress, anxiety and depression
- relieving pain and stiffness
- promoting endorphins that help control blood pressure
- treating and preventing sports-related injuries
- boosting immunity by circulating oxygen and nutrients
- exercising atrophied muscles which eases medication dependence
- reducing post-surgery adhesions by promoting joint flexibility
- relieving migraines

If aches and pains are getting in the way of doing the things you love, or you're tired, stiff and in need of some extra energy, then book a Masseur massage today.

There's even an express 10 min massage for those in a hurry!

# Why Zero Gravity?

Masseuse Massage chairs boast zero gravity positioning - eliminating pressure off your spine. By selecting this mode, the chair will glide into a horizontal position, with your legs elevated to either level with, or higher, than your heart. The chair will then mould itself to the shape of your spine.

Once in this zero gravity position, the chair will begin its therapeutic massage cycle. All the while, you'll be in the optimal position for the massage to relieve muscle pain - giving you a complete sense of weightlessness while feelings of stress and tension gently melt away.

## Fully Customised Treatments

20 minute treatment	<b>\$25</b>
30 minute treatment	<b>\$30</b>
40 minute treatment	<b>\$35</b>

Select from seven different massage treatments, customised as desired.

## Express Treatment

10 minute express massage	<b>\$15</b>
---------------------------	-------------

Please note that customised changes are not available with this treatment option.

# Treatment Menu

**Comfort Massage** - Just firm enough to loosen tight muscles from your head to your toes, without the intensity of a full deep tissue massage.

**Relax Massage** - The softest treatment option - this is perfect for a gentle all over massage and to promote blood circulation.

**Stretch Massage** - Based on chiropractic practices, where the space between the vertebrae is widened to avoid bone spurs and neural compression, this is a highly effective wellbeing and maintenance treatment.

**Full Body Massage** - Activates tension relief from your head to your toes with deep tissue massage, so sit back and relax while your aches and pains are alleviated.

**Neck and Shoulder Massage** - A deep tissue option that focuses on releasing knots and tension around your neck, shoulders and back.

**Back and Waist Massage** - A deep tissue massage for the back and waist to relieve aches, pains, soreness and tightness in predominately the lower body.

**Full Air Massage** - Engages 60 air cushions placed around the body and applies compression massages to your arms, shoulders, back, hips, legs and feet to relieve any built-up tension. Massage hands are not activated for this option, making it a perfect massage for those who are recovering from injury or surgery.
